Daily life waterproof

#### Specifications in-ear:

**Sensitivity:** 99dB ±3dB @ 1 kHz  
**Frequency response:** 20Hz – 20kHz  
**Impedance:** 32 ohm±15%  
**Driver setup:** 2-way Hybrid  
**Crossover:** 2-way  
**Features:** 2-pin socket  
**Average attenuation:** 26dB

## Functions & Operation

### Power on

When UTWS1's off, press the button for 1 second until the blue light flashes 3 times with "Power on" prompt tone.

### Power off

- When UTWS1's on and not connected to cellphone, long press the button for 5 seconds until red light flashes for 3 times and then turns off with the "Power off" prompt tone.
- When UTWS1's on and connected to cellphone, turn off the main earphones and the other one will automatically reconnect to the cellphone.

### Pairing

- Pairing with mobile phone -- when it's off, long press the button for 5 seconds until the red and blue light flashes alternately to enter pairing mode with "Pairing" prompt tone. Search "FiiO UTWS1 L" or "FiiO UTWS1 R" on cellphone to pair; UTWS1 will automatically turn off when it fails to connect within 5 minutes;
- Pairing of left and right earphones -- the left and right earphones will automatically search for each other after starting up. Please keep the left and right earphones within a distance of 20cm, and the left and right earphones will automatically connect and enter the pairing mode.
- When pairing with new device, just press the button on any side for 5 seconds to enter the pairing mode, the other earphone will connect to the previous earphones automatically after starting up. The one that powers on or connects to cellphone first is the main earphones, and the other side of the earphone would automatically connect to the main ear.

Note: if the left and right earphones cannot enter the pairing mode, please clear the pairing before pairing.

### Clear pairing

When the earphones is off, long press the button for 10 seconds until the red and blue lights flash twice with the prompt tone "ding ding ding ding ding" to clear the pairing between the phone and the earphone and the left and right earphones. After clearing the pairing, the left and right earphones will start up and enter the pairing mode automatically.

Note: the left and right earphones' pairing info should be cleared at the same time, otherwise it wouldn't enter the pairing mode.

### Next track

When music is playing, long press the button on R side for 2 seconds to switch to the next song;

### Previous track

When music is playing, long press the button on L side for 2 seconds to switch to the previous song;

### Play/pause

When music is playing, double-click the button on R side to pause the playback; when the playback is paused, click the button on either side to resume music playback;

### Volume up

Click the button on R side to increase the volume by one level at a time, until it hits the loudest volume with "beep" sound;

### Volume down

Click the button on L side to turn down the volume by one level at a time until it hits the lowest volume with "beep" sound;

### Answer the call

When there's incoming call, click the button on either side of the earphones to answer the call.

### Hang up the phone

During a phone call, click the button on either side to hang up the phone call.

### Decline call

When there's incoming call, double-click the button on either side to decline the phone call.

### Voice assistant

When connected to the mobile phone, double-click the button on the L-side headset to activate the voice assistant;

### Reconnecting

After starting up the headset, the left and right sides are automatically connected and reconnected to the last connected device. If the connecting fails within 10 seconds, the headset will enter the pairing mode again.

### Charging instructions

#### Low Battery

When the remaining Battery is less than 5%, the red light flashes every 1 minute with "Battery low, please charge" sound.

#### Charging

Please charge the L and R side headphones at the same time with the complimentary cable. When charging, the red light flashes. The blue light lights up when it's fully charged.

### Precautions

- It's recommended to charge the device using a standard 5V charger or charger that could output 1A current or above.
- Please don't place the device in circumstance of excessive high/low temperature (above 45°C or below 0°C)
- Bluetooth wireless technology has a working range of approximately 10 meters. Transmission distance is affected by obstacles (human, metal objects, walls, etc.) or electromagnetic environment and noise or audio loss may occur.
- Prolonged use of high volume may result in permanent hearing loss. Switching between audio sources may cause a sudden change in volume. Please turn the headset to the low volume level before wearing the headset;
- If the device is to be left unused for a long time, please recharge it periodically to preserve its battery life.
- Please do not disassemble, damage the battery, or drop it into fire; it's prohibited to continue using after the battery is soaked in water.

## Purchase Note

"Due to the limitations of the Qualcomm QCC3020 chip adopted by the UTWS1, although we have made a lot of improvements, there will still be a slight soft rustling background noise with high sensitivity earphones (above 105dB), which will be covered by music when playing music normally. So if you are particularly sensitive to the noise floor, please think carefully before buying. Thank you for your cooperation and understanding.

"It is not recommended to switch frequently between the 2pin cables and the 2pin bluetooth modules on the in-ear speaker. This can cause cable breaches and/or 2pin connection problems.

## Warranty Terms and Conditions

### 1 year warranty

\*warranty is null and void under the following circumstances:

- Defect or damage caused by improper operations such as vibrating, bumping, falling to the ground, buckling, excessive pulling, etc.
- Defects or damage caused by disassembly of the product by user or unauthorized repair personnel.
- Unable to provide proof of purchase, such as purchase invoice

Bluetooth chip:	QCC3020

Battery life:	8 hours
Standby time:	180 hours
Charging time: approx.	1.5H
Output power:	5mW (32Ω)
Charging connector:	micro-USB
Weight (single unit):	6.5g

## JABRA MOTION PRODUCT BENEFITS

**Busylight***Avoid call interruptions with the Busylight indicator*

Jabra Busylight helps you to cope with the open office environment challenges and let people clearly know you are on the phone. The indicator turns red when you are on a call and keep you from being interrupted.

**Call Assist***Call Assist lets you take a call without a click*

Jabra's intelligent Call Assist lets you take a call without a click. Built in Motion Sensor technology turns the headset on when you pick it up or touch it, and automatically answers the call when you place it on your ear. If you are already wearing the headset, you can accept or reject a call using just your voice.

**HD Voice – Wideband Audio***High quality audio for crystal clear conversations*

Enjoy high-definition sound with HD Voice and get crystal clear, intelligible communication. You get life-like, vibrant conversations where you can focus on the content and don't have to struggle to understand what the person on the other end of the line is saying.

**HiFi Audio Streaming***Stream music, podcasts and GPS directions*

Jabra Bluetooth® devices featuring A2DP allow you to stream music, podcasts, and even GPS directions in HiFi quality to give you enhanced sound experience.

**Intelligent Volume Control***Adjusts call volume automatically*

With Jabra Intelligent Volume Control, you are now free from touching the volume control. The audio level adapts automatically to the interference noise around you, allowing you to hear what is being said wherever you are.

**Jabra Connect***Customize your headset and control your devices*

The Jabra Connect app interacts actively with your headset and lets you customize your user experience to suit your preferences as well as control all your calls on multiple devices.

**Noise Blackout™***Eliminate background noise interference*

Jabra Noise Blackout™ technology eliminates disturbing background noise such as wind, surrounding conversations or traffic to enhance your voice. So you can now talk freely without raising your voice excessively.

**PeakStop™***Safe sound and superior hearing protection*

PeakStop™ technology immediately removes potentially harmful loud sounds or tones before they reach your ears and keeps the sound level within the safe range to protect your hearing.

**Power Nap Mode***Automatically enters power nap mode*

With Jabra Power Nap Mode, you can now leave your headset in the car or on your desk for days and still have it ready when you are. Your device automatically goes into sleeping mode when inactive. A great power management feature that gives you more talk-time, less charging.

**SafeTone™***Enhanced hearing protection*

Jabra SafeTone™ includes Jabra PeakStop™ and Jabra IntelliTone™, the enhanced hearing protection technology. Benefit from clear, crisp and automatic limitation of average volume exposure during your workday according to acoustic standards and regulations. A feature that offers you significant confidence, safety and comfort while enhancing the quality of your communication.

**Smartphone & Tablet Ready***Ready for use with the latest smartphones/tablets*

Your Jabra device is designed with future-ready technology to be fully compatible with the latest smartphones and tablets on the market.

**Tap-To-Connect***Connects devices with a simple touch*

Near Field Communication technology (NFC) makes it easy for your Jabra device to instantly connect and interact with phones, tablets, and interactive tags. It requires no more than a simple touch. Just tap the phone and the Jabra device together and you are ready to talk or stream your music.

**Voice Controls***Be notified and take control with your voice*

Jabra Voice Controls cover both Voice Commands and Voice Guidance functionalities. With Voice Commands, you can answer/reject a call, play music, call back, and so on. Your own words control your device. Voice Guidance verbally notifies you of crucial status updates, such as connectivity and low battery.

**Wind Noise Protection***Block intrusive wind noise*

Wind Noise Protection enables you to keep the thread of your conversation in open air environments without any interference. Walk, bike, run, work outside and talk with no need to raise your voice or shout to be heard.

**8-Hour Battery Life***Talk up to 8 hours with no battery life concerns*

A wireless audio device would not be a useful tool without an incredible battery life. Even with so much performance packed into such a small space, it still lasts up to 8 hours on a single charge. So you can talk and work as long as you want.

## JABRA MOTION UC/JABRA MOTION OFFICE

**Jabra Software Applications***Easy device configuration and softphone integration*

Customize and control your audio device settings with Jabra's software applications. You get full integration and remote call control with the latest generation of softphones.

**Multi-device Connectivity***Manage all your calls from one single headset*

Multi-device connectivity technology lets you manage phone calls from several different devices such as desk phones, tablets, PCs and smartphones, with one single headset. You get greater flexibility and enhanced user experience.

**Remote Asset Management***Remote mass deployment and device management*

Configure and implement the company's audio devices 100% remotely from one central point. You get the latest features and functionalities on one go with Jabra Xpress, a web-based solution. You can also get a complete overview of all Jabra audio devices installed in the IT network with Jabra Xpress' asset management component.

**UC Plug-And-Play***Plug-and-play with all leading UC platforms*

Jabra devices feature intuitive call control and seamless connection to all leading UC applications and softphones. They are easy to set up and easy to use, leaving you free from any installation expertise or extensive training requirement.

**Up to 100 Meter/300 Feet Wireless Freedom***Hands-free communication up to 100 meters/300 feet*

Featuring Bluetooth® Class 1, your Jabra device enables you to connect to a vast range of devices from smart phones and tablets to laptop computers. You get a wireless mobility up to 100 meters/300 feet giving you full control of your hands-free Jabra voice solutions. You can call and multitask on your terms.

## JABRA MOTION OFFICE

**Hot Desking***Empower mobile workers with a flexible office environment*

Save time, money and office space and give mobile employees a more flexible work environment. Jabra Motion Office enables multiple employees to use the same office space at different times. Just plug in your headset to any Jabra Motion Office base and you're ready to work.
