

W Series Comparison

- Designed for the music enthusiast
- Micro balanced armature driver design
- Unrivaled sound signature tuned by artists

UNIVERSAL-FIT

Overview

The "W" Series is specifically designed for optimized personal listening, because Westone believes that music lovers should hear what the artist and producer intended when they listen to an artist's recording. Each W Series earphone contains from one to six drivers, depending on the model, for the absolute best sensory listening experience imaginable. The specially made ear tips use an ergonomic design incorporating lessons learned on fit and design gathered over the last five decades of manufacturing millions of products for the human ear. Along with providing extreme comfort, the ear tips isolate ambient noise to provide the utmost clarity.
